THE ONLY TRENDS ARE
THE ONES YOU DRAW.

I'm innovative, surprising, smart.
I required a lot of effort from the design team
because I'm used to exceed all expectations,
inside and outside. Together we will experience
the infinite blue, discover a profound closeness
with the sea. With me the unexpected
at sea becomes a collection.

Bluegame's BG74

successful fusion of power & style

T rue to its commitment to defy all stereotypes, that has always been the brand's signature style, the new Bluegame BG74 is the perfect expression of its cross-over soul, which escapes from belonging to a single segment. With the BG74, Bluegame goes even further by combining the concepts of the BG and BGX ranges; the result is a successful fusion of open and flybridge. The BG74's remarkable layout, with a completely open upper deck and the original lower deck of the BGX range, is destined to bring lovers of both typologies together, without compromises.

KEY FEATURES

The Bluegame BG74 is a game-changing yacht that masterfully blends the characteristics of both open yachts and flybridge yachts, offering a revolutionary hybrid layout. Its design is a seamless fusion of the BG and BGX ranges, combining the open upper deck with the innovative lower deck design. This results in a yacht that caters to diverse yachting lifestyles, eliminating the need for compromise.

The BG74 boasts a high-performance hull, developed with renowned naval architect Lou Codega, and is powered by the advanced Volvo IPS propulsion system. This ensures superior handling, excellent performance, and low fuel consumption, making it both efficient and enjoyable for long-range cruising.

The BG74's cockpit stands out with its 360° visibility, enhanced by an inverted glass windscreen. For the first time on an open yacht, this feature offers complete weather protection or privacy when desired, ensuring safety and comfort in any conditions.

Outdoor living spaces are spread across three levels: a beach area in direct contact with the sea, a spacious main deck featuring a sun lounge, dining area, and flexible bow space, and a sundeck designed for relaxation and easy accessibility. This thoughtful design creates a seamless connection between the yacht's exterior and the sea.

The interiors of the BG74 are customisable, providing a choice between a saloon with direct beach access for a social layout or a master cabin overlooking the sea for privacy and serenity. High-quality materials and finishes, such as Canaletto walnut, leather, and light fabrics, add a touch of sophistication and reflect the owner's personality.

As the ultimate cross-over yacht, the BG74 is not confined to a single category. It bridges the gap between traditional flybridge yachts and open yachts, delivering a vessel that redefines versatility and luxury, making it a standout in Bluegame's innovative lineup. Whether for social gatherings, private getaways, or adventurous cruises, the BG74 offers the perfect balance of style, function, and performance.
