PREMIUM ELECTRIC SURFBOARDS

## Electric surfboards inside

“Why would I ever need anything else, other than this thing right here?”

*– Anyone who has ever ridden an Awake Board*

## Welcome

---

Awake is a Swedish electric surfboard manufacturer with the mission to fast-forward a sustainable future of action water sports.

Stay Awake

## Becoming Awake

“Why do I need all this gear...?” – This question is what drove wakeboarder and Awake co-founder Philip Werner to build his first electric surfboard in 2012; a rebuilt windsurf board with a small turbine and lithium batteries. This was likely the beginning of the electric surfboard industry. The real journey began one year later, which launched a new segment within the water sports industry.

In 2017, Philip and his two partners founded a company with the purpose of creating the best and most desired, cutting-edge, high-performance electric surfboard on the market....

RÄVIK S

---

## RÄVIK S / Introduction

This is Awake's race model, the most advanced electric surfboard on the market. The W-shaped, hydrodynamic hull, slim tail, and aggressive rocker enables deep carves, high jumps and overall superior agility.

The Awake RÄVIK S is perfect for anyone who is looking to challenge themselves on each ride, no matter if it's on a motosurfing course at a flat lake, or in over-head waves out at sea.

## RÄVIK S / Specifications

Top speed:	<b>55 kph / 34 mph</b>
Acceleration:	<b>0 – 50 kph / 30 mph in 5 sec</b>
Range variations:	<b>Standard* and XR**</b>
Weight (Standard):	<b>39 kg / 86 lb</b>
Weight (XR):	<b>43 kg / 95 lb</b>
Riding time (Standard):	<b>15 – 20 min</b>
Riding time (XR):	<b>20 – 45 min</b>
Charging time (Standard):	<b>1 h 20 min</b>
Charging time (XR):	<b>2 h 00 min</b>
Rider modes:	<b>ECO, SPORT, EXTREME</b>
Dimensions (L/W/B):	<b>175 x 61 x 27 cm / 69" x 24" x 11"</b>
Guarantee:	<b>24 months (EU standard)</b>

\*Standard – A complete board outfitted with a **standard-range battery** – See pg. 19 for full information.

\*\*XR – A complete board outfitted with a **long-range battery upgrade** – See pg. 19 for full information.

Exhilaration defined

# RÄVIK 3

---

## RÄVIK 3 / Introduction

The culmination of everything we've learned making high-performance electric surfboards, perfect for both cruising and racing. It's quieter with improved acceleration, an improved motor, and an even more intuitive hand controller.

Combine all that with a completely new V-shaped hull design, and you have a board ready to provide extreme thrills or something a little more relaxed; whatever you choose – you'll have fun out there.

## RÄVIK 3 / Specifications

Top speed:	<b>57 kph / 35 mph</b>
Acceleration:	<b>0 – 50 kph / 30 mph in 4 sec</b>
Range variations:	<b>Standard* and XR**</b>
Weight (Standard):	<b>40 kg / 88 lb</b>
Weight (XR):	<b>44 kg / 97 lb</b>
Riding time (Standard):	<b>15 – 30 min</b>
Riding time (XR):	<b>25 – 50 min</b>
Charging time (Standard):	<b>1 h 20 min</b>
Charging time (XR):	<b>2 h 00 min</b>
Rider modes:	<b>ECO, SPORT, EXTREME</b>
Dimensions (L/W/B):	<b>179 x 62 x 26 cm / 71" x 25" x 10"</b>
Guarantee:	<b>24 months (EU standard)</b>

\*Standard – A complete board outfitted with a **standard-range battery** – See pg. 19 for full information.

\*\*XR – A complete board outfitted with a **long-range battery upgrade** – See pg. 19 for full information.

Awake your next adventure

# RÄVIK ONE

---

## RÄVIK ONE / Introduction

This is the premier model of our high-performance electric surfboards. It's a no fuss-leisure board, perfect for anyone who is looking to get going as easily as possible.

The RÄVIK ONE's robust design, wide tail, and M-shaped hull, gives you great stability and control. Thanks to the high buoyancy, and the rear-located center of gravity, the Awake RÄVIK ONE uses less energy and therefore allows for longer riding times.

# RÄVIK ONE / Specifications

Top speed:	<b>56 kph / 35 mph</b>
Acceleration:	<b>0 – 50 kph / 30 mph in 4 sec</b>
Range variations:	<b>Standard* and XR**</b>
Weight (Standard):	<b>38 kg / 84 lb</b>
Weight (XR):	<b>42 kg / 92 lb</b>
Riding time (Standard):	<b>20 – 40 min</b>
Riding time (XR):	<b>30 – 60 min</b>
Charging time (Standard):	<b>1 h 20 min</b>
Charging time (XR):	<b>2 h 00 min</b>
Rider modes:	<b>ECO, SPORT, EXTREME</b>
Dimensions (L/W/B):	<b>179 x 61 x 29 cm / 71" x 24" x 11"</b>
Guarantee:	<b>24 months (EU standard)</b>

\*Standard – A complete board outfitted with a **standard-range battery** – See pg. 19 for full information.

\*\*XR – A complete board outfitted with a **long-range battery upgrade** – See pg. 19 for full information.

Ultimate cruising pleasure

# Accessories

## RÄVIK Battery / **Standard**

Standard-range battery

### Specifications

Power: **1.9 kWh**  
 Charging time: **1h 20 min**  
 Weight: **18 kg / 40 lb**

### Riding time

RÄVIK S: **15–20 min**  
 RÄVIK 3: **15–30 min**  
 RÄVIK ONE: **25–40 min**

## RÄVIK Battery / **XR**

Long-range battery

### Specifications

Power: **2.9 kWh**  
 Charging time: **2h 00 min**  
 Weight: **22 kg / 48 lb**

### Riding time

RÄVIK S: **20–45 min**  
 RÄVIK 3: **25–50 min**  
 RÄVIK ONE: **30–60 min**

## RÄVIK Charger

- Fast, efficient, and safe thanks to the battery monitoring system (BMS)
- Custom-built enclosure for plug-and-play functionality
- Secured during charging with Awake's industry-leading locking mechanism
- Waterproof AC Inlet, water splashes resistant
- Soft handle for easy carry

## RÄVIK Board bag kit

Board bag kit for logistical ease

- Perfect-fit insert
- Dedicated accessories compartments
- Custom-fitting charger bag
- Large click-in-wheels
- Water resistant material
- Easy-drain with bottom zipper
- Internal straps for secure transportation

## RÄVIK Power key leash

The magnetic power key leash

- Magnetic safety feature to activate/deactivate the battery during riding and charging
- Overmoulded "Dead Man's Switch"
- Loose, short spring action
- Strong Dyneema material for superior quality

## RÄVIK Fins

Awake x MFC performance fins

- RÄVIK S and RÄVIK 3: Awake's custom fin design provides better grip in sharp turns, and stability at higher speed
- RÄVIK ONE: The custom quad fins set included with the board was designed around stability and speed
- Together with the optimized hull shape, they provide an unparalleled stability at higher speed
- Fits FCS 3/4" fin boxes

## RÄVIK Foot straps

Custom-made comfort foot straps

- Designed for comfort and adjustability
- Memory foam sole
- Adjustable tightness
- Four included screws fixes the bindings to the board (two per binding)
- 5 different positions are available on the board and battery

## Awake x ION vest

Custom-branded impact vest

- Custom-made with Awake's signature logo
- Designed to protect the torso from impacts\*
- Made of light-weight neopren

**\*[NOTICE]:** The impact vest is not a certified floatation device! It offer limited floating assistance. For proper an instruction to proper floatation devices, please check local regulations with coast guard or similar.

Simplicity and ease-of-use

# Technology

## Designed for action

If Awake boards can make it here, they can make it anywhere, because Scandinavian waters provide some of the world's harshest marine conditions. As a result of the unique innovations we've developed, our boards can withstand salty, tumultuous waters, high surface speeds, rough handling, and over-enthusiastic riders. In fact, we say bring it on. The hydrodynamic hulls and rocker designs, as well as the pioneering jet system are all constructed in lightweight yet extraordinarily robust and rugged materials. All of which guarantees the most exciting adrenaline-inducing experience possible.

## Engineered for a safe ride

Automotive standard safety efforts, including multiple layers of mechanical, electrical, and software features, provides a state-of-the-art safety system. Numerous sensors, including constant monitoring of temperature, power consumption, system abnormalities, and physical orientation of the board, ensure a safe and reliable experience for the user. All the modules are individually water-sealed. Cloud-connectivity technology logs usage data and enables remote system updates provided by our engineering team. This technology ensures that our clients always have the latest product upgrades and software, no matter what model or year they purchased their electric surfboard.

## Ease-of-use at our core

At Awake, simplicity and user experience is in complete focus. As we are all keen riders ourselves, we have spent countless engineering hours encapsulating our pioneering technology to make everything as convenient as possible for the end-user. Modularity and changeability offers the user a simple, modular product from the outside, packed with innovative technology on the inside. The battery requires no cables, neither in the board nor the charger. We try to maximise weight-to-power ratio, and all handles are in the right place – to make it easy to ride as well as to carry.

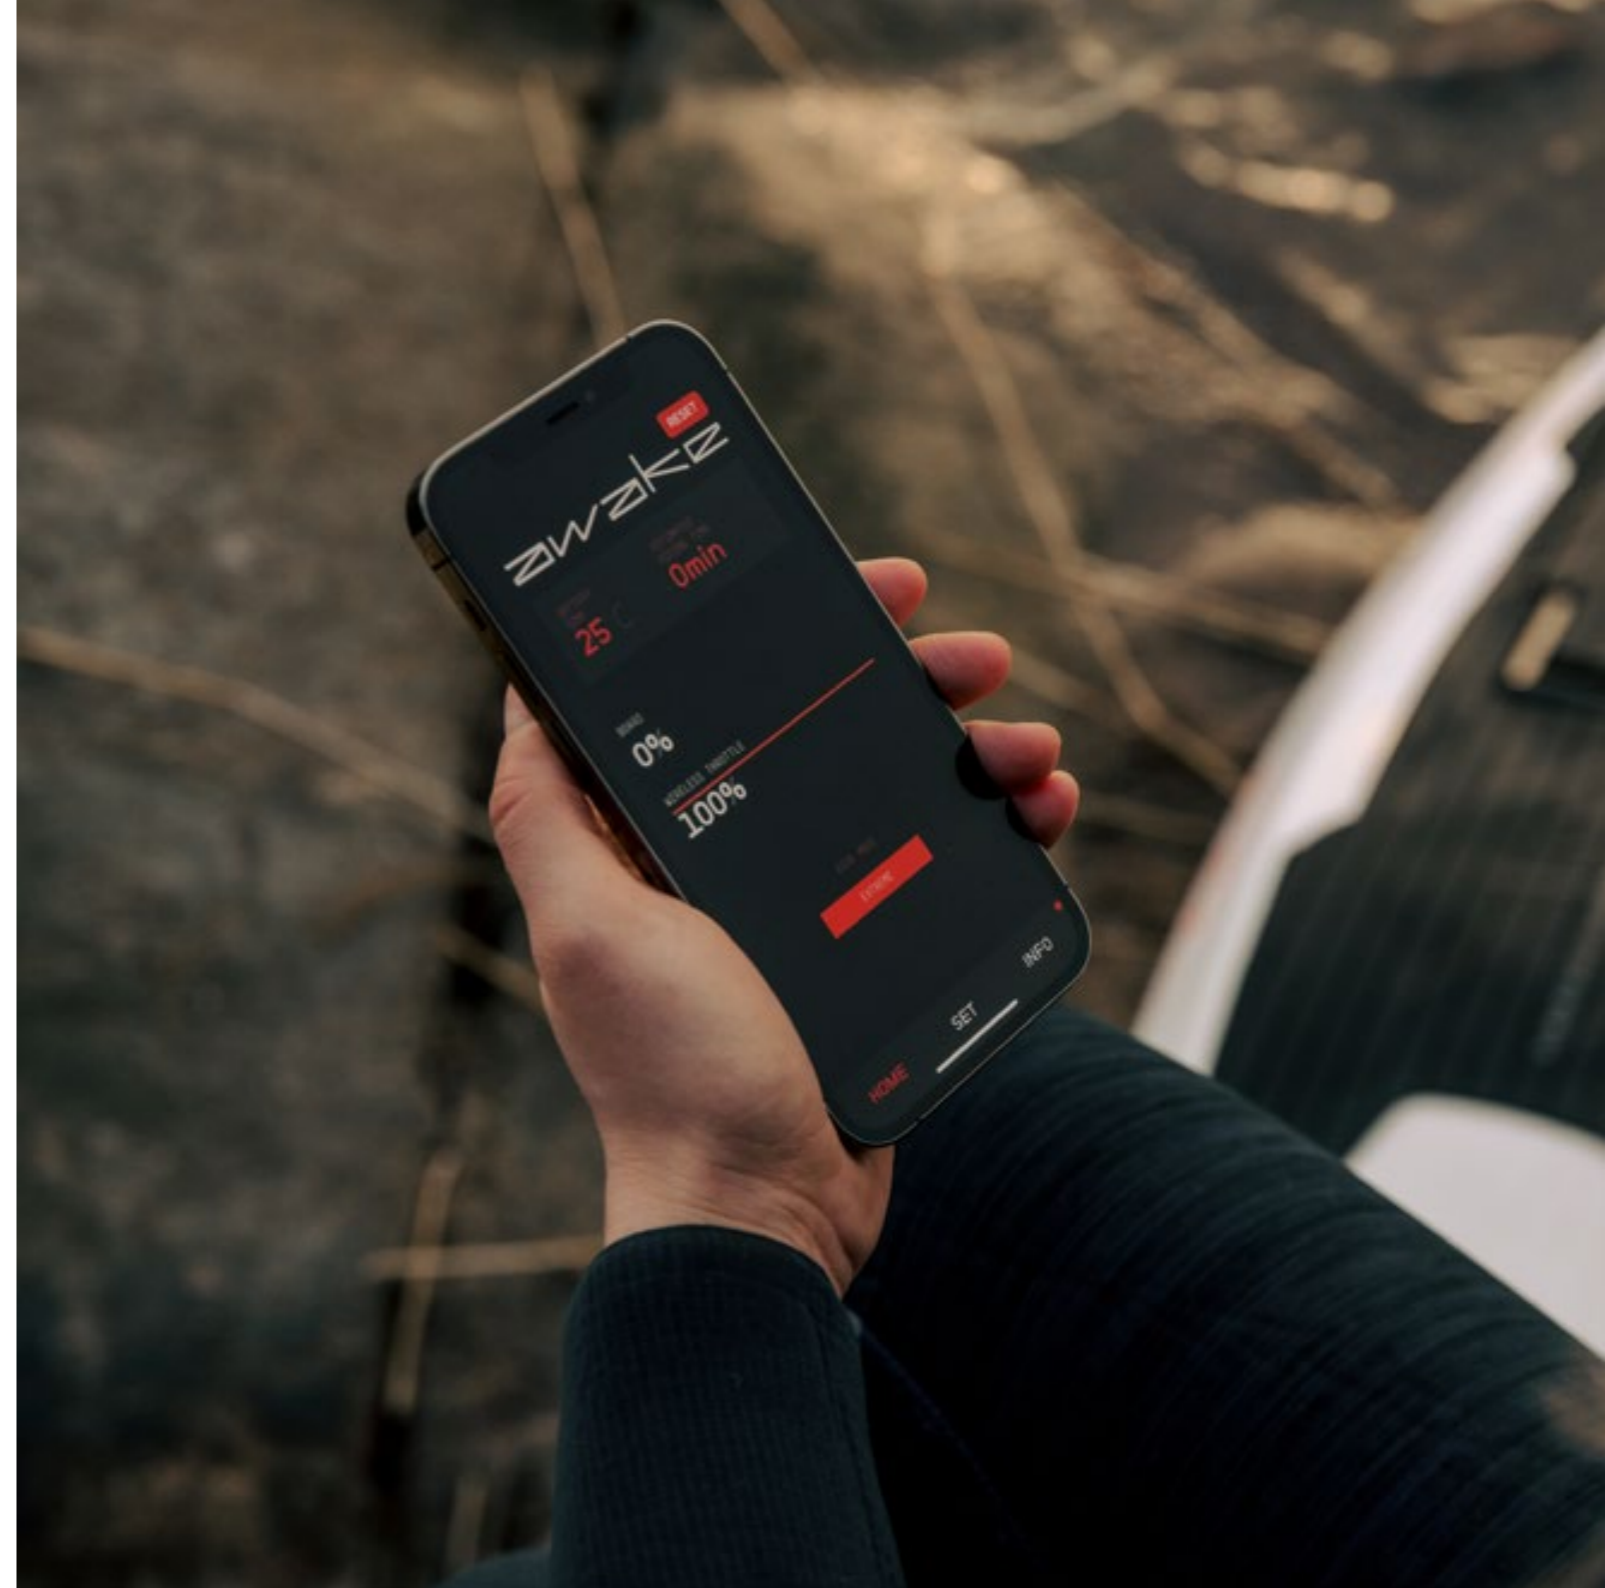

## Cloud-connectivity / **The Awake App**

Awake Boards offer three different riding modes; **ECO**, **SPORT**, and **EXTREME**. These modes are for safe use; no matter what experience you have, set the correct/preferred mode in the Awake App before you leave the shore, and you'll be safe.

Remote diagnostics allow for quick and convenient customer support. If abnormalities are detected in your board, our engineers can quickly diagnose any potential issue and guide you through the support process. When performance and safety improvements occur, you will be able to update your firmware and software via our app.
