Introducing the new Aquila 28 Molokai

The incredible ride, inspired by native Hawaiian watercraft, is born from the rigors of island hopping in the tumultuous waters of the Pacific Ocean, making the Aquila 28 Molokai Power Catamaran perfectly suited for almost any boating condition.

Key Features

The impressive stability and formidable ride along with the large aft and forward cockpits make the Aquila 28 Molokai ideally suited for offshore fishing with family and friends, tournament competition, and even professional charter sportfishing. And, although the Aquila 28 Molokai Power Catamaran is primarily designed as a fishing platform, family-friendly features abound.

When not being used for offshore fishing or diving, friends and family can enjoy other waterborne activities, including tow sports, or just relax onboard while visiting a favorite dockside restaurant, sand bar, or island. Lounge on the bow seating area or pull up the bow table and enjoy your favorite beverage at sunset with up to 10+ guests onboard.

Because the hulls are spaced wide apart, the broad stance makes it easy to walk around both sides of the center console. The position of the center console provides a 360-degree line of sight with controls strategically positioned for ease of operation. The extra-large console dash is

designed to support two large multifunction displays along with the Mercury® engine monitoring displays and Fusion® sound system head unit.

The Molokai is truly a versatile boat that amplifies your boating lifestyle.

Specifications

Model - Aquila 28 Molokai

Length - 9.4m/30.9ft

Max Beam - 3m/9.8ft

Gross Tonnage - 2.7

Engines - 2x150/200HP

Fuel tank - 2 x 285 l

Fresh Water Tank - 60 l

Simpson Marine has secured a brand-new Aquila 28 available for quick delivery this summer.

Aquila 54 Luxury Power Catamaran

The Aquila 54 had its official launch in autumn of 2021 and we it has just won the prestigious “Power Multi-hull of the Year 2021” award from *Multicoques Magazine*, proving again its tremendous potential and popularity among motor yacht enthusiasts.

Key Features

The Aquila 54 Yacht Power Catamaran embodies the reliable features and construction methods of the hundreds of Aquila yachts and boats cruising the waters of the world. This model also enhances on-board luxuries with full size refrigeration and layouts that include 3, 4, and 5 cabin options as well as skipper’s quarters and “galley-down” layouts.

Owners will delight in panoramic views that fill the master cabin with natural light through large hull side windows, adding to the spacious feeling of the full-beam forward master cabin. Engineered with an open flybridge and solid glass front windscreen, or a completely enclosed and climate controlled flybridge, the Aquila 54 Yacht Power Catamaran features the versatility to appeal to a global audience of boating enthusiasts.

We are amazed by the full beam master cabin with extensive windows providing a lot of daylight and an amazing dressing room in the starboard hull. We have seen the generous space and comfort aboard the 44 and we are fully confident that the 54 will enjoy similar success.

The saloon resting area with two huge sofas including one vast U-shape sofa within the dining table and a smart bar area serving the galley and saloon at the same time eludes a true home-like feeling.

First Aquila 54 in Asia has been sold by Simpson Marine to Pattaya and will arrive in April 2022.

Aquila has enjoyed great success in Asia since early 2018 when Simpson Marine took on the dealership as the brand's exclusive representative in the region. Aquila's appeal to Asian customers is due to a wide range of models with an appealing combination of excellent features. These include expansive living area volumes, good stability, smooth drive, easy handling, sleek modern designs, a strong quality of build, and high finishes along with many innovative features. Currently Aquila catamarans cruise in China, Hong Kong, Singapore, Malaysia and Thailand and the fleet is regularly expanding.

Specifications

AQUILA 70 –

King of the Power Catamaran

Gorgeous lines, perfectly balanced, intelligent luxury. These are just a few ways to describe the new flagship, Aquila 70 Luxury Power Catamaran. This breathtaking and powerful catamaran is like nothing you have ever stepped aboard. With an aesthetically pleasing design at every angle, the Aquila 70 looks like the stunning luxury yacht that it is.

Key Features

Power and maneuverability come from the Volvo Penta inboards coupled with joystick control. Carbon fiber reinforcements keep the weight down while adding to the yacht's strength. The high bridge-deck clearance allows for even more comfort underway and improved speeds.

At 21-metres, the Aquila 70 boasts generous spaces and is engineered for comfort and range. Featuring design work by multihull design experts Morelli & Melvin Design Studio, she is the perfect combination of intelligent luxury design and breath-taking innovations. She can deliver high speeds worthy of a performance oriented motoryacht, with top speeds of 27 knots. An impressive vessel with multiple features and utilities, she has state-of-the-art amenities on board and fantastic outdoor socialising areas including the signature cockpit open bar.

For your relaxation and entertainment needs, the Aquila 70 was designed with European flair making it bright, inviting, and welcoming including a 27' wide master suite. Versatile interior layouts, along with rich wood finishes, soft fabrics, smart appliances, designer furnishings, incredible headroom, and panoramic windows make your experience onboard even better.

Outdoor areas receive just as much attention. Aquila's signature stairs make it easy to access the foredeck from the flybridge, which can be fully open or enclosed with A/C and a wide Portuguese bridge for easy access from aft to bow. If you prefer, spend your time hanging out aft, with its comfortable plush seating, huge beach area, a deep swim ladder and excellent dinghy launching.

Headquartered in Clearwater, Florida, Aquila Power Catamarans is backed by a team of experts from Sino Eagle Group—a development, design and world leading manufacturer. This partnership with Sino Eagle Group has been instrumental in assuring high-quality parts built with consistent finishes and the enhancement of the uncompromising design seen every Aquila yacht. With approximately 65% of the materials used in the manufacturing of an Aquila being purchased from highly recognised marine OEM

suppliers in the United States and Europe and shipped to Sino Eagle facility for installation, the company's advanced composite manufacturing capabilities have ensured owners and partners have the highest standards of building work undertaken on every Aquila build.

Aquila's International Sales Director Yvan Emieu expands on the build process, saying: "From day one of building Aquila, we set ourselves apart by having the highest quality control possible. This started with the production facility and fiberglass building techniques using resin infusion in humidity and temperature-controlled lamination bays".

Specifications

Model - 70
 Length - 21.3m / 69.8ft
 Draft - (m/ft) 1.45m / 4.9ft
 Max Beam - (m/ft) 8.2m / 26.9ft

Beneteau, MICAD & Nauta combine expertise on Grand Trawler 62

The Grand Trawler 62 is the result of Beneteau's collaboration with Massimo Gino (Nauta Design) and Amedeo Migali (MICAD) and capitalizes on the highly successful Swift Trawler range of practical, spacious boats, with a considerable cruising range, putting Groupe Beneteau's experience in producing luxury boats to good use.

Exterior Design

The Grand Trawler 62 has a distinctive displacement hull, developed by MICAD with the aim of improving its efficiency & cruising range, making it easier for owners to cast off on long-distance cruises. She is 18.95 meters long (62') and has a hull beam of over 5 meters (16'5"). Designed for 6 to 8 people on board (+ crew), the boat has an impressive flybridge – one of the biggest on the market.

Interior Design

The interior spaces are spacious and well-appointed. The galley can be completely enclosed. The VIP guest cabin in the bow has a considerable amount of headroom. Strikingly spacious inside, with volumes similar to much bigger yachts, and ingeniously designed, these large passagemakers also have enough space to comfortably house a crew. A satin wax finished wood, leather and elegant textiles make for a stylish interior and exterior, carefully designed by the experts at Nauta Design. The midship owner's suite, makes clever use of the maximum beam, so that you really feel like you are staying in a hotel suite.

Specifications

Model - Grand Trawler 62
Length - 19m / 62ft
Max Beam - 5.4 m / 17.7ft
Displacement - 28 tons
Engines - 2x 730HP
Fuel tank - 2 x 2000L
Fresh Water Tank - 840 l

Simpson Marine has secured a brand new Grand Trawler 62 for Asia.
