The Squadron 68 is a spacious flybridge design that combines all the best features of its Fairline sisterships in the Squadron range — the 48 and 53 — with even more onboard space. Perfect for adventuring long distances, it is both rugged and elegant. Designed by Alberto Mancini, the 68 has a modern, bold profile and open-plan living is the watchword both inside and out.

The Squadron 68 features new hull windows and a re-designed hard top — with the option of an electric canopy to cover the bar unit. The lower helm has a two-stage sliding door option with a manual fold-up window that immediately transforms the section into a bar area.

The Squadron 68 is available with 3-cabin and 4-cabin layouts. This advanced design ensures superior on water living.

Boasting uninterrupted views, the flybridge has no less than three individually styled areas to choose from, including triple

sunloungers aft, a sumptuous dining space and forward seating.

There are four custom interior décor schemes to choose from — Amalfi, St Tropez, the Hamptons and Capri — in order to create a bespoke design.

The single level main saloon is the largest interior guest space, with lounge seating, an entertainment system including large pop up TV, bar and dining space. The saloon flows around the open aft-facing modern galley, with socialising and entertainment at the heart of the yacht's entire design.

Alberto Mancini's fluid layout easily leads you from space to space, with a bright and open feel in living areas and throughout the yacht.

With a cruising speed of 25 knots, and top speed of 33, the Fairline Squadron 68 can get you to the farthest reaches of the territory within hours. And, for £2.5 million delivered with typical options and a favourable exchange rate, that's really good news. Even better news, Simpson Marine has a stock boat arriving next month. Call Richard Allen on 2555 8377 for all the details.
