

Live the ultimate experience on board The **Best Toys & Tenders**

At Simpson Marine, we have an excellent reputation for delivering exceptional yacht services and taking care of customers throughout every aspect of the yacht purchase and ownership journey. We also strive to expand your yachting journey to ensure you have the ultimate fun and exciting experiences to enjoy the waters in several ways.

We can help equip your yacht with the best toys and gadgets for enjoyment whilst at anchor. Let's start exploring!

A luxury yacht tender can be enjoyable as the base point for many activities such as water-skiing, wakeboarding, and towing inflatable toys such as banana boats and doughnuts.

In just 10 years, Highfield Boats has become the world’s number one aluminium hulled RIB manufacturer. They now offer small tenders from 2m up to a full line of heavy-duty RIBs on any ocean. Developed to handle the tough conditions found along the Great Barrier Reef, Swift RIBs are renowned for their durability and performance.

				
ROLL UP RU200 – RU320	ULTRALITE UL240 – UL340	CLASSIC CL260 – CL460	SPORT SP300 – SP900	PATROL PA420 – PA860
Overall Length

SEABOB

High-performance toys
For intense pleasure driving in the water

Whether you are cruising, zipping through the water or diving, the SEABOB will glide along powerfully with you aboard.
Its hydrodynamic shape provides for an astounding degree of agility in the water. Steering and diving could not be easier – it only requires the pilot to shift their body weight.

awake

Premium Manufacturer of High-performance Electric Surfboards

Awake builds high-performance electric surfboards & e-foils that propel the rider up to speeds over 50 kph in mere seconds. The speed is controlled by a wireless hand controller remotely connected to the board. You steer by simply shifting your balance, just like on a regular surfboard. Awake boards are created for performance, quality, and safety, to give you an experience you simply can't be without.

The Awakeboard was designed with one key factor in mind: Adrenaline. With three models to choose from – Vinga 3, Vinga S, RAVIK 3 and RAVIK S, there is something for everyone from cruising to racing.

	VINGA 3	VINGA S	RAVIK 3	RAVIK S
	The easiest high-performance eFoil	The most extreme eFoil	Combines cruising and race	A pure and hydrodynamic carving machine for the ultimate challenge

FLite

The World’s Most Awarded E-foil

Flite provides a high-performance water machine that is packed with innovation and built to the highest safety standards from quality materials.

Fliteboard is an exhilarating water toy that amps up summer water activities and lets you fly above the water controlled by a remote in your hand. The sweet spot for most riders. Short enough for performance, long enough for stability and freedom. Comfortably supports 100kgs of neutral buoyancy before take off. Teach family or share with friends. With 20 virtual gears, you can find your limit – from gentle cruising to eye-watering speed. All at your fingertips.

PACKAGE INCLUDES

It's Time To Ride The Waves

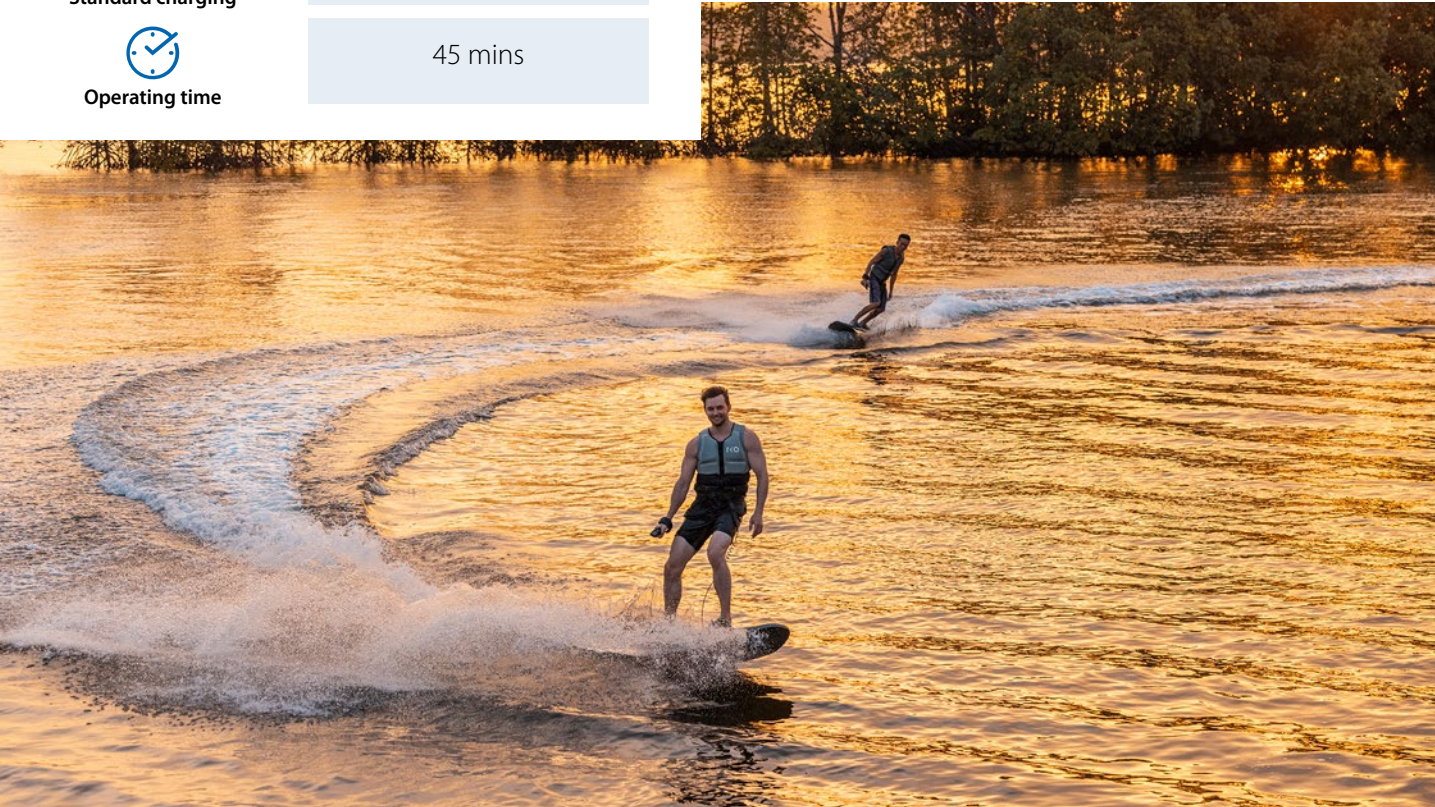

The Kinetic Option pushes the boundaries of naval architecture and electric drivetrains with their first product, the TKO Type-001. Painstakingly crafted from high-performance materials, this advanced jetboard opens up a world of possibilities across lakes, rivers, and coasts.

The TKO-001 is an all-electric jetboard conceived over tireless months of research and real-world testing. Every component is unique to the board. The jet pump, battery, hull, motors, and controllers are all custom designed from the ground up to give the best possible performance. The result has been a balanced and safe platform that adapts to the user's skill level, from a complete beginner to a surf pro. Power levels can be customized directly from the wireless handheld controller without any external apps and can be adjusted on the go. Multiple magnetic safeties ensure that the battery is only live when it's installed correctly into the board, and the power cuts immediately when the rider falls off. A fully sealed and passively cooled drivetrain ensures more time on the water, no polluting lubricants and requires no maintenance.

TYPE - 001

Dimensions L x W x H	189 x 58 x 19 cm
Weight	20 kg
Motor	12kW liquid cooled rotor
